-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Claims 5-8 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on 12/15/2008.

Claim Rejections - 35 USC § 102

2. The rejection of claims under 102, as stated in paper dated 3/10/2009 is withdrawn in view of applicant's arguments in paper dated 9/8/2009.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4 and 9-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patents 6900225 Takemura and 5849757 Takemura.

Takemura both teach (col 8 for 225 and col 23 for 757) a process of ring closure to make a quinoline compound using the same steps as instantly claimed. The difference between the processes is not in the process itself, but of the precursor and end products themselves. The 225 Takemura has di-fluoro on the starting and ending product as compared to the instantly claimed mono-fluoro. However, the di-fluoro does not impact or change the process of ring closure as is

instantly claimed. Takemura 757's difference is also the di-fluoro (in the same position as Takemura 225) and additionally other substituents that do not impact or change the process as instantly claimed. The process steps are the same. The end products are comparable to the instantly claimed end products. The difference being the different reactants give the same substituted ring closure end products with the same di-fluoro substituents.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use the process taught by Takemura with the reasonable expectation of getting the same or similar products since the ring closure does not change due to the presence or absence of different substituents that are not involved with the ring closure process. Rationale: The process would have been obvious because the substitution of one known element for another would have yielded predictable results to one of ordinary skill in the art at the time of the invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Margaret Seaman whose telephone number is 571-272-0694. The examiner can normally be reached on 730am-4pm, Monday-Thursday.
